

## Initial Form 1099 Composite production timeline

To ensure timely tax reporting while limiting corrections, Schwab produces Form 1099 Composite in two separate production runs, depending on the types of investments held, the reclassification status of dividends received and when trading has occurred in the account. Because many corrected 1099 forms are triggered as a result of securities with reclassified income or wash sales with deferred losses resulting from January purchases, Schwab uses the second production run to limit the amount of corrected forms sent to clients.

Starting mid-February, you can view your client's Form 1099 Composite on Schwab Advisor Center® by individual account. Form 1099 Composite information is also available in bulk as follows:

- Advisor bundles** (zip files) are available approximately 48 business hours after the 1099 forms have posted to all linked sub-accounts. Once available, the bundled files can be downloaded from the **Documents** tab at a master level for a rolling 12 month period.
- 1099 data delivery** files contain information provided in Schwab's Form 1099 Composite. A new file is created each time Schwab generates Form 1099 Composite and contains data for the sub-accounts associated with a single master account. The 1099 data file is not an official tax document and is provided as a convenience.
